DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I in the reply filed on 7/6/07 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1- rejected under 35 U.S.C. 102(e) as being anticipated by Vosteen et al. US 6,878,358.

Regarding claim 1, Vosteen '358 discloses combusting coal and releasing mercury in a coal fired plant (abstract, column 2), injecting a bromine compound into the furnace and/or flue gas to oxidize mercury (abstract and column 4), and adsorbing the oxidized mercury (abstract and column 5).

Regarding claims 3-4, Vosteen discloses lignite (column 2, lines 32-42).

Application/Control Number: 10/751,496

Art Unit: 1754

Regarding claims 6-8, Vosteen discloses fly ash and multistage cleanup (abstract, column 4 lines 28-33).

Regarding claims 16-17, Vosteen discloses at least 800 degrees C.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2- rejected under 35 U.S.C. 103(a) as being unpatentable over Vosteen '358.

Regarding claim 26, Vosteen '358 discloses combusting coal and releasing mercury in a coal fired plant (abstract, column 2), injecting a bromine compound into the furnace and/or flue gas to oxidize mercury (abstract and column 4), and adsorbing the oxidized mercury (abstract and column 5).

Vosteen fails to disclose elemental and oxidized mercury.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to oxidize elemental

Application/Control Number: 10/751,496

Art Unit: 1754

mercury because Vosteen discloses oxidation with a bromide compound.

Regarding claims 2 and 27, it would have been obvious to one of ordinary skill in the art at the time the invention was made to use ammonium bromide because Vosteen discloses examples of ammonia and hydrogen and sodium bromide (Examples and column 4).

Regarding claim 5, Vosteen discloses lignite (column 2, lines 32-42).

Regarding claims 8-15, 18-25, and 28-33, Vosteen discloses fly ash and multistage cleanup (abstract, column 4 lines 28-33) ammonia and hydrogen and sodium bromide (Examples and column 4) and it would have been obvious to one of ordinary skill to choose a stoichiometric ratio of 1 or 0.8-1.16, NaOH, and/or urea, achieved by routine experimentation.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward M. Johnson whose telephone number is 571-272-1352. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman can be reached on 571-272-1358. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
